PROFESSIONAL EXPERIENCE

Python Developer Trainee Doctosmart Edutech Pvt.Ltd,Government Cyberpark, Calicut, October 2024 - February 2025

Python Developer Intern
Zion IT Pvt.Ltd, Kozhikode
November 2023 – june 2024

PROJECTS

CRM Development Live Project

Role: Backend Developer
Company: Doctosmart Edutech

- Developing and maintaining core CRM modules using Python and Django.
- Built front-end functionalities with HTML, CSS, JavaScript and React to enhance user experience.
- Designed and optimized database schemas using MySQL, ensuring scalability for growing customer data.

Clinical Management System (CMS) Live Project

As a Full-Stack Developer at Doctosmart Edutech, I was responsible for developing a Clinical Management System (CMS) to streamline patient care, manage appointments. The project involved building a robust backend using Python and Django Rest Framework (DRF, designing an intuitive frontend using React , Tailwindcss and JavaScript, and optimizing database schemas using MySQL to ensure scalability and performance. The system was designed to enhance the efficiency of healthcare providers and improve patient outcomes.

PERSONAL SKILLS

- Hard Working
- Quick Learner
- Time Management
- Self Motivated

E-COMMERCE PROJECT

- Developed a dynamic e-commerce platform using Python Django.
- Enabled users to browse and filter products by category, enhancing the shopping experience.
- Implemented features for adding products to the cart and managing purchases.
- Integrated MySQL as the database to manage product inventories, user data, and transactions efficiently.
- Incorporated the Razorpay payment gateway to ensure secure and reliable online transactions.
